# Non-abrupt Change Variable Attenuator

无突变可变衰减器

VAS Series, Step 步进式 (DC ~ 6GHz)

International patent product

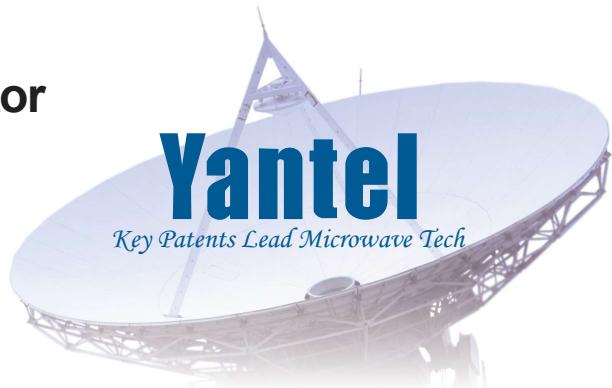

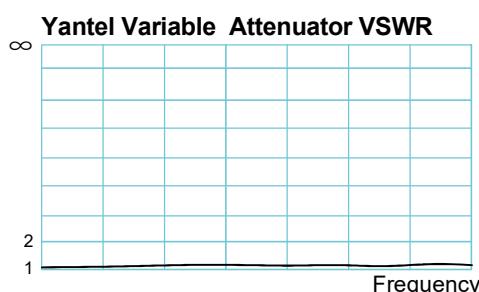

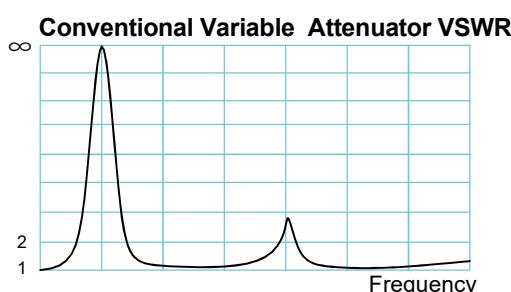

China Patent No.:CN 2008 8 0001111

USA Patent No.:US 8,212,648 B2

EU Patent No.:EP2190116A4

- Abrupt change of reflection occurs in conventional variable attenuator when adjusting attenuation, resulted in RF Power Amplifier being burnt.

## Features

- Using advanced microstrip technology, ultra-small size
- High RF performance, ultra-competitive price
- Wide frequency range: DC to 6 GHz
- Low VSWR :1.1 ~ 1.5
- Low attenuation tolerance, low insertion loss.
- Adjusting the transmitting (receiving) distance of RF signal precisely. Adjusting accuracy is limited to 5cm.
- Wide attenuation values available are 1, 2, 3, 4, 5, 6, 8, 9, 10 and 12 dB.
- High adjustment accuracy
- Power rating: 2W, 5W
- Impedance: 50Ω or 75Ω
- Switch repeatability avg.>10000 operations(5000 cycles) per switch.
- PC(Polycarbonate) switch, operating temperature up to 120 °C
- It adopts an innovative technology, and thus it eliminates sudden big reflection in attenuators when attenuation is being adjusted, preventing the preliminary RF circuit(such as power amplifier) from being burnt, and keeping the system stable.
- Attenuation values are adjustable in power-on state, test data can be read continuously, no interruption.
- Connector Type: SMA, N, F, BNC etc. available
- Connector Position: Back Connectors or Left & right Connectors

## Applications

- DAS POI
- Indoor Repeater
- Wireless Signal Coverage
- Mobile communication repeater station system
- Signal emitter inside buildings
- WLAN repeater station system
- Radar
- Lab test
